Price/unit (net): 249,-€

For cans and plastic bottles, we developed a special backpack. It can be quickly put into action – just insert the chilled cans and bottles in the individually adjustable compartments and you are ready to sell.

The Drink Man Cans & Bottles was developed to easily distribute all prefilled beverages. Whether you use it for slim energy drink cans, for plastic bottles, or for standard cans – nearly all will fit.

With the Drink Man Cans & Bottles, you can act quickly and immediately to meet sudden demand. Just fill the individually adjusted, insulated compartments with chilled cans and bottles and you are ready to sell.

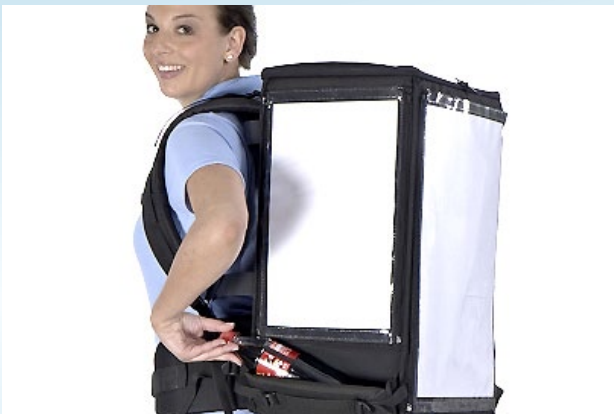

Carrying System/Backpack

The ergonomic carrying system provides maximal carrying comfort, with cushioned hip belt and shoulder straps that are individually adjustable to each different user.

The thermally insulated backpack is split into two chambers. The Chambers can be adjusted to different can and bottle sizes.

Dispensing drawers on both sides.

Advertising Area

The three advertising spaces on the Drink Man Cans & Bottles are guaranteed to attract attention. The ad space is on the back (30x45 cm) and on two sides (each 23 x 35 cm). Changing the product message is incredibly simple and your ad is protected by clear plastic on all sides. In addition to these large advertisements, two flags can also be mounted to the Drink Man Cans & Bottles. (Not available through Cup Service).

Cup Dispenser (optional) (89,-€)

If the venue does not allow you to pass on cans and bottles directly to the customer, we offer an optional cup dispenser which is placed on the left side of the Drink Man Cans & Bottles.

This dispenser, utilizing the rubber-lip system, can dispense a large variety of different-sized cups.

Price: 60,-€
