Drink Man EASY

Mobile drink dispenser for carbonated products

The Drink Man EASY is a mobile drink dispenser specially designed for carbonated drinks/products.

It boasts a light but extremely strong design, and is available in both soft drink and keg tap versions.

Its excellent carrying comfort, professional look and high functionality are just the thing for optimal brand presentation.

Behind an EASY-to-change transparent PVC cover is an advertising space measuring 76 x 39.5 cm.

Technical data:

Weight (without liquid)	9.5 kg
Weight excluding tank	6.2 kg
Height	60 cm
Width	42 cm
Depth	35 cm

Price per unit (net): € 699.-

The outer shell of the Drink Man EASY is made from a highly robust, washable tarpaulin. The inside features the same polypropylene foam block as in the Drink Man Classic, which gives the shell its shape and stability. This determines the functional organisation of the interior, can be rinsed out for hygienic cleaning and, of course, provides an insulating function.

From left: cup chute, tank compartment, CO₂ bottle holder and dispensing tap inlet tube. Secure, upright positioning of the CO₂ bottle with the mounted stainless steel gas regulator is essential to ensure the proper functioning of these components and safe operation. The central tank compartment allows quick and EASY insertion and removal of the tank with one hand. The tank can also be rotated for speedier connection with the tubes.

Once the unit has been refilled, you simply close the cover and zip it up, thus protecting the mechanism and cups from accidental removal or contamination.

The frame of the Drink Man EASY ensures a high level of functionality and carrying comfort.

The integrated cup dispenser takes cups up to a max. diameter of 88 mm.

Rubber membranes control the separating mechanism of the cup dispenser. These are available with various aperture sizes and can be changed as needed. They ensure secure, firm support as well as EASY removal of the cups. Maximum cup diameter approx. 88 mm.

Four rubber feet ensure good stability and generally prevent the body of the unit from coming into contact with the ground.

The Drink Man EASY comes with a flag holding facility (flag not supplied).

Quick change procedure (no tools required):

Stainless steel gas regulator with safety valve, pressure gauge (3 bar) and hose outlet (8 mm outer diameter). Connects to CO₂ bottle via a trapezoidal thread.

The aluminium CO₂ bottle has a capacity of 450 grams. The combined weight of the gas regulator and full gas bottle is approx 1.4 kilograms.

Insulated dispensing tap with compensator:

The plug-in couplings and connections can be changed as required without the need for tools. The hose has an outer diameter of 8 millimetres and an inner diameter of 4 millimetres.

All prices are quoted net ex factory Munich
